### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 5-12 are allowed, as prior art of record does not teach or suggest a method of measuring and reporting real-time SNR measurements during magnetic resonance imaging, including calculating a relative SNR variant based upon the acquired signal-to noise ratio, in combination with the remaining limitations of the claims.

Claims 2-4 are allowed, as prior art of record does not teach or suggest a method of measuring and reporting real-time SNR measurements during magnetic resonance imaging, including calculating a relative SNR variant based upon the acquired signal-to noise ratio, in combination with the remaining limitations of the claims.

Claims 13-20 are allowed, as the prior art of record does not teach or suggest an apparatus and method for calculating a real-time SNR of a magnetic resonance imaging signals, wherein an image processing engine calculates an acquired real-time signal-to-noise ratio for each of a plurality of real-time images and develops with a reference signal-to-noise ratio a relative signal-to noise variance, in combination with the remaining limitations of the claims.
